To Whom It May Concern:

I would be delighted to attend the Alaska Head Start Association Conference in Juneau. I feel as a young single mother of two, it will provide me with confidence, guidance and reassurance to receive adequate information about my child's growth in development. This trip, to me, would be a stepping-stone for myself in the involvement of my child's education.

Encountering parents from all over Alaska, I believe, would be an exciting experience in it's own. To see other parents with their concerns and to hear their point of views of the topic discussions would be magnificent. To talk with other parents about their concerns and involvement with head start and to learn new ideas for the years to come would be most beneficial for myself and to bring back to my community.

To share the aspects of our head start program with others and to enlighten them about the efforts our community puts forth with our children would be an honor for me to represent. I am proud that my child attends this program and would be pleased to report back the experience and possible opportunities our community can consider.

Thank you for your consideration,

Signed

Genevieve Dyasuk
