To Whom It May Concern:

I am interested in going to the Head Start Convention in Juneau because I'm interested in finding out all about Head Start from the program itself, design, funding (for the program and fund raising), and importance of parents' involvement, selection of teachers and how the students are benefitting from head start. How I will share the information once I get back to Togiak is sharing my involvement in the convention in our meetings, what I learned and share the information I collected by making copies if needed. If selected, I greatly look forward to this and thank you for your time.
